Classroom Update

I am very pleased to be teaching your child and look forward to getting to know them as the year progresses. This year we will begin with the Intensive French block. Our day will usually begin with Advisory followed by Math. French takes place after recess with ELA happening at the end of the day with Miss. Chevarie. Our specialities (Music and Phys. Ed.) will happen in the morning as well. For more specifics, please check your child's agenda. Our switch to the Non-Intensive French Block will take place in February. I will send information on the switch

once it happens. The students seem to be adjusting well to Marshview. It does take a little time to get use to the school layout but I think they are getting

the hang of it! We have been reviewing School Rules and Procedures as well as classroom expectations so that the students are aware of what we ex-

pect from them here at Marshview. There are lots of opportunities to get involved in clubs and activities so encourage your child to try something new this year. If you have any questions or concerns during the school year, please feel free to contact me via email or in writing in your child's agenda which I check each morning. As well, Marshview will be hosting a Meet the Teacher night on September 18th. This will be informal meeting to visit the classroom and say hi. Hope to see you then.

Math

Most days we will begin with Math. We will work on our critical thinking and problem solving skills. We have begun the year with some review of numbers and have reviewed the different ways to represent them. We will continue to build on to this

knowledge by applying what we know to larger numbers. This month we will also work on estimating and discussing if our answers are reasonable. Near the end of the month, we will practice using patterns to help solve problems. We will look at equations and solve

for unknown variables. Lots of learning to kick-
